

Computacion Visual Interactiva - 2019-2: Final project Pierre Raimbaud

A WebGL screensaver using random cubic Bezier curves

A WebGL screensaver using random cubic Bezier curves

Motivation

Figure 1 and 2 Animated Objects

Animation = translations and rotations

A WebGL screensaver using random cubic Bezier curves

Motivation

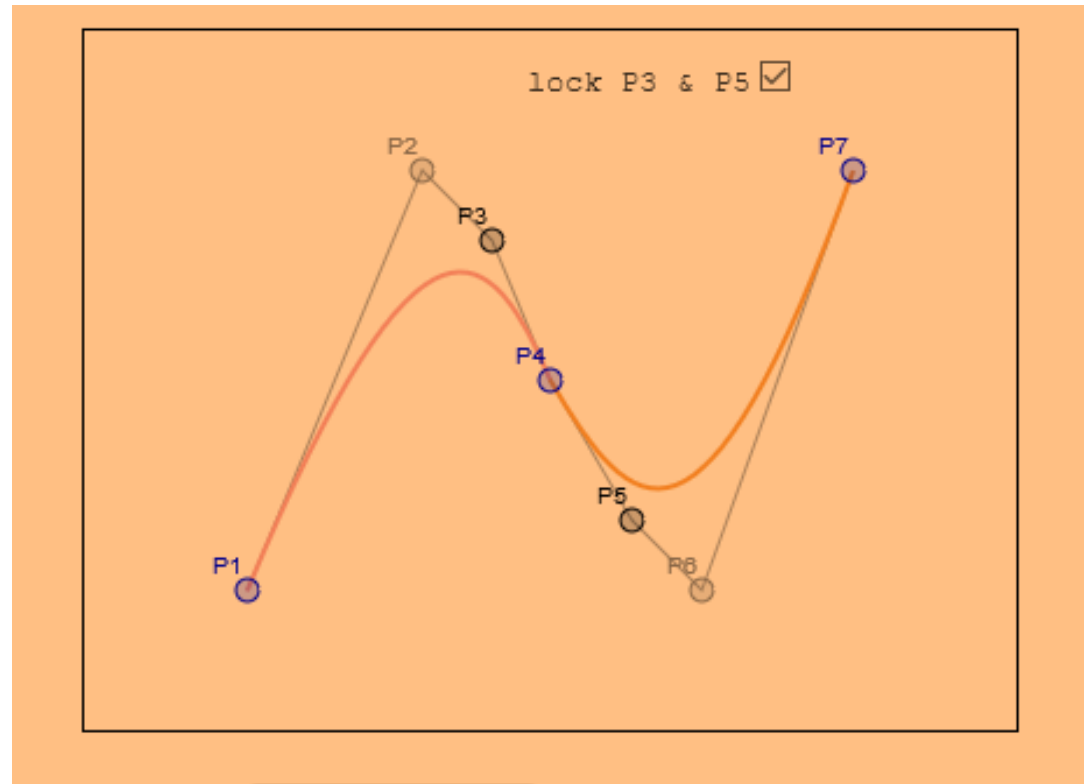

Figure 3: Bezier and points of control

(source : <https://webglfundamentals.org/webgl/lessons/webgl-3d-geometry-lathe.html>)

A WebGL screensaver using random cubic Bezier curves

Motivation

Figure 4: WebGL screen saver
(source : <https://1j01.github.io/pipes/>)

A WebGL screensaver using random cubic Bezier curves

Contribution

Figure 5: My screen saver

A WebGL screensaver using random cubic Bezier curves

Contribution

Figure 5: My screen saver

- Random curves
- One curve follows the previous one
- 4 points of views
- 2 objects following different curves
- Textures and colours
- Bash file for auto launch and F11 (screen saver mode)
